

**With immediate effect**, we are able to offer you the usual RAVENOL engine oils in a completely new container size so that we can respond to the variety of vehicle types and their specific engine characteristics even more effectively.

## New – RAVENOL is now available in a 7 L canister

That's why we've developed a new RAVENOL canister with a capacity of up to 8 L. Its looks and shape fit in with the range of RAVENOL containers which you are already familiar with from the other 1 L, 4 L and 5 L sizes. The canister also has all the safety features to protect against product manipulation, such as the patented closure, the transparent viewing strip on the side of the canister with a scale to see the fill level and of course the special holographic RAVENOL labels for front and the back and the individual code on the back.

Other varieties are also available on request. The programme for supplying oils in the new 7 L canister is being continuously extended. Please speak to our sales team. This also applies if you are interested in 7.5 L or 8 L containers.

You will find other RAVENOL products for your vehicle in our oil finder on [www.ravenol.de/oel-finder.html](http://www.ravenol.de/oel-finder.html)

You are guaranteed to find the right oil for your vehicle here.

To launch the "big brothers", both of the following varieties will be available in the new RAVENOL 7 L canister in a packing unit of three canisters per box in addition to the previously available sizes:
